

COVERT™ PRO SERIES

Go pinless. APEX™ GEAR proudly continues to advance the most powerful and versatile single-pin sights on the market – still without a physical pin to crowd the view. COVERT™ PRO maintains all the advantages of a long-range sliding sight, but with unique PWR•DOT™ LED technology. Tactile push-button brightness controls simplify use in the field, and a gear-drive elevation dial provides smooth and precise adjustment.

COVERT PRO is available with a standard green LED dot, or a DOUBLE•DOT green and red LED aperture. The red LED acts as a secondary pin and provides a point of aim for extreme distances beyond the range of the yardage tape.
